PROFESSIONAL OVERVIEW

Full Stack Developer with nearly 4 years of experience building web applications using **React.js, Next.js, TypeScript, Node.js, Express.js, and MongoDB**. Experienced in **B2B applications, REST APIs, backend development, authentication, reusable UI architecture, and performance optimization**, with hands-on experience in **AI-assisted development using GitHub Copilot, MCP, and Spec-Driven Development**.

WORK EXPERIENCE

Associate Consultant

Infosys, Bangalore | July 2025- Present

- Developed **B2B procurement and quoting workflows for Spark New Zealand**, supporting quotes, stock, pricing, margins, and multi-currency operations.
- Developed **REST APIs and backend functionality** using **Node.js, Express.js, MongoDB, and Mongoose**, covering CRUD operations, schema design, validation, middleware, error handling, and business logic.
- Implemented **JWT-based authentication and authorization**, including access and refresh token workflows, password hashing, protected routes, and **RBAC**.
- Built reusable **React.js and TypeScript** components for dynamic tables, inline editing, drag-and-drop workflows, bundle management, and multi-currency functionality.
- Improved **frontend performance by ~25%** through memoization, debouncing, optimized state updates, and render minimization; achieved **90+ Lighthouse Performance and Best Practices scores**.
- Developed customer-facing **phone trade-in journeys** using reusable React components.
- Used **GitHub Copilot and MCP** for AI-assisted implementation, debugging, and context-aware development, including Figma-based UI workflows.
- Applied **Spec-Driven Development and Matt Pocock skills** during the **legacy styling-to-UDS migration**, using structured specifications and AI-assisted workflows to implement repository-wide changes consistently.

Programmer Analyst

Cognizant Technology Solutions, Bangalore | Nov 2022 - June 2025

- Developed a scalable web platform using **Next.js and TypeScript**, replacing IBM Lotus Notes and implementing dynamic routing, contributing to a **~35% improvement in load speed**.
- Built **type-safe and reusable React components** to improve maintainability, reduce UI defects, and accelerate development.
- Implemented **Redux Toolkit** for predictable state management and **SCSS-based modular styling** for maintainable UI architecture.
- Improved **Google Lighthouse performance** through lazy loading, semantic HTML, image optimization, and JavaScript bundle optimization.
- Developed **unit and integration tests** using **Jest and React Testing Library** to improve application stability and test coverage.
- Supported **Azure CI/CD pipelines and Docker-based development environments** for consistent application builds and deployments.

SKILLS

Frontend: Next.js, React.js, React Router, Redux Toolkit, JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS, Tailwind CSS

Backend & APIs: Node.js, Express.js, MongoDB, Mongoose, REST APIs, JWT, CRUD, RBAC, Postman

Testing & DevOps: Jest, React Testing Library, Git, GitHub, Azure CI/CD, Docker

AI & Engineering: GitHub Copilot, MCP, Spec-Driven Development, Matt Pocock Skills, Figma, Lighthouse, Accessibility

EDUCATION

CMR Institute of Technology, Bangalore

Bachelor of Engineering (B.E) in Mechanical Engineering - 8.9 CGPA

ACHIEVEMENTS & CERTIFICATIONS

- ISRO Research Project** - Design and Development of Six DOF Robotic Arm with Gripper to Capture Non-Cooperative Spacecraft.
- Placement Coordinator, CMRIT** - Represented Mechanical Dept. and drove campus recruitment activities.
- Full-Stack Web Dev (Hitesh Choudhary)**- Completed hands-on certification covering modern full stack technologies.
